EN 1996-1-1 GL NA:2025

National Annex to

Eurocode 6: Design of masonry structures – Part 1-1: General rules for reinforced and unreinforced masonry structures

Foreword

This Greenlandic National Annex (GL NA) replaces EN 1996-1-1 GL NA:2024.

This Annex is based on DS/EN 1996-1-1 DK NA:2019.

Scope

This Annex is adapted to national, geographical and climatic conditions as well as national legislation and specifies how EN 1996-1-1+A1:2013 is to be applied in Greenland.

The Annex provides Greenlandic national choices and complementary information. For any complementary information, it is specified whether it is normative or informative. Normative information comprises requirements to be followed.

The numbering in the Annex refers to the numbering in EN 1996-1-1+A1:2013 or DS/EN 1996-1-1 DK NA:2019.

Overview of Greenlandic national choices and complementary information

DS/EN 1996-1-1 DK NA:2019 is applicable with the following national choices and complementary information:

Clause	Subject	Change
DK NA	References in DK NA	National choice
DS/INF 167	Reference to DS/INF 167	Complementary information

National choices

References in DK NA

References in DS/EN 1996-1-1 DK NA:2019 to other Danish National Annexes are replaced by references to corresponding Greenlandic National Annexes. Where these do not exist, the Danish National Annexes apply.

Complementary information **Informative**
